

4PROCESS

Use case:
Collaborative and
coordinated work

4PROCESS is the comprehensive solution for the design and execution of the organization's processes, ensuring that the work is done in a coordinated and homogeneous manner. Fewer errors and faster execution times with digital step-by-step instructions and real-time traceability of all active processes.

4PROCESS:

4PROCESS facilitates the execution of processes in which different employees intervene in a coordinated manner, reducing the time of resolution of incidents and the number of errors. It allows to homogenize the way of working between different locations and to improve the traceability and follow-up.

1

Accuracy

Support to employees with step-by-step instructions in the execution of all types of processes: maintenance, quality checks, prevention of occupational risks, line changes...

2

Support

It helps the user to carry out his work in a safe and assisted way, with associated documentation, check-list or linking the execution of some step of the process to external variables of machinery or employees (temperature, pressure...)

3

Collaborative work

Coordinated work in processes that include various roles of employees who must work collaboratively.

4PROCESS traceability, coordination and real-time monitoring of active processes.

Multidevice: PC, Tablet, Smartphone, Smartwatch or Smart Glasses

4PROCESS

Advantages:

Improved productivity

Support and training

Improved quality and fewer errors

Access to IT-OT information

Real-time process information

Process standardization

Generation of evidence

Collaborative work

Better information analysis

Elimination of paper

Traceability and auditing

15%

Reduction in
execution time

20%

Improvement in
efficiency

100%

Compliance and
traceability
