

4PROCESS

Use case:
Occupational risk
prevention and safety

4PROCESS allows to ensure that work is performed under safe conditions, develop protocols for action in risk prevention, standardize procedures and improve occupational safety audits.

4PROCESS:

Many front-line workers are at unnecessary risk because of a lack of clear procedures in performing some tasks or failure to follow recommendations on risk interventions. 4PROCESS ensures that the execution is done safely, according to the processes marked by experts in occupational risk prevention.

1

Job record

Notice and record of conformity and traceability of mandatory PPE in some areas or when performing certain operations.

2

Check-list

Checklists to ensure that all tasks required for safe and assisted intervention are performed.

3

Generates evidence

Traceability of process execution and improvement of documentation in safety audits.

4PROCESS ensures the execution of the processes in a safe and assisted way.

Multidevice: PC, Tablet, Smartphone, Smartwatch or Smart Glasses

4PROCESS

Advantages:

Improved productivity

Support and training

Improved quality and fewer errors

Access to IT-OT information

Real-time process information

Process standardization

Generation of evidence

Collaborative work

Better information analysis

Elimination of paper

Traceability and auditing

15%

Reduction in
execution time

20%

Improvement in
efficiency

100%

Compliance and
traceability
