

4PROCESS

Use case:
Step-by-step instructions
in processes

4PROCESS allows the design and execution of all processes in the organization, with digital step-by-step instructions and real-time monitoring of active processes. All information at the service of the connected employee at the time he needs it.

4PROCESS:

4PROCESS allows the design and monitoring of digital instructions step by step, in complex processes with conditional logic or repetitive tasks, improving homogeneity and reducing execution time by more than 15%.

1 For all your processes

Step-by-step instructions in the execution of tasks in multiple areas of the organization: maintenance, quality checks, work safety, line changes, etc.

2 Support and homogeneity

It includes documents in video format, photo, plans, etc... to carry out the work in a safe, efficient way and to facilitate the homogeneity in the execution. And it dynamically updates the processes when necessary.

3 Collaborative work

It improves collaborative work in processes that include various roles of employees who must act in a coordinated way.

4PROCESS step-by-step instructions and real-time monitoring of active processes.

Multidevice: PC, Tablet, Smartphone, Smartwatch or Smart Glasses

4PROCESS

Advantages:

Improved productivity

Support and training

Improved quality and fewer errors

Access to IT-OT information

Real-time process information

Process standardization

Generation of evidence

Collaborative work

Better information analysis

Elimination of paper

Traceability and auditing

15%

Reduction in
execution time

20%

Improvement in
efficiency

100%

Compliance and
traceability
