

4REMOTE Health

Use case: Collaborative medicine

4REMOTE Health facilitates communication between health professionals remotely. It makes it possible to advise other professionals on new surgical techniques, treatments, or even to set up multidisciplinary committees to make diagnoses or assess treatments.

4REMOTE Health:

4REMOTE Health allows a communication between several professionals and specialists to work in a collaborative way and to be able to advise, indicate or reach a joint agreement in topics referred to the diagnosis of patients, treatments or new techniques carried out.

- 1

Possibility of integrating multiple video sources, even in the operating room, so that the committee or professionals gathered remotely have all the necessary information.
- 2

Possibility to incorporate several video sources with option of mosaic or main view of one of the participants in case you want to emphasize at some point.
- 3

Precise real-time indications on the video thanks to Augmented Reality.

4REMOTE Health facilitates collaboration between professionals.

Multidevice: PC, Tablet, Smartphone or Smart Glasses

4REMOTE Health

Functions

- Drawings and text on snapshots and video
- Augmented Reality Pointers
- Recording of evidence (video, audio and photo)
- Remote-controlled zoom and flashlight
- Remote control of fixed cameras
- Real-time translation (chat and voice)
- Screen sharing
- Agenda - Calendar of scheduled sessions
- Multi-user sessions
- Multi-device
- Multi-session
- Sessions with external users by invitation
- Selectable Audio/Video sources
- Secondary "slave" camera
- Mosaic view of connected video feeds
- Integration with clinical operating room equipment (laparoscopy, cameras...)
- Cloud and OnPremises deployment
- Encrypted communications
- Can be integrated with customer systems
- LDAP Integration
- Session log and evidence
- Instant messaging
- Multi-screen

Advantages:

- Shorter response times
- Reduced travel and costs
- Improved traceability and monitoring of work
- Generation of evidence
- Remote validations
- Support and training of medical personnel
- Better patient experience
- Improved attention quality and fewer errors
- Collaborative work - knowledge sharing
- Increased efficiency of the doctor-patient ratio
